**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Examiner acknowledges receipt of request for extension of time, remarks and request for reconsideration, filed 12/23/05. Claims 1-9 and 11-19 are pending.

#### *Claim Rejections - 35 USC § 103*

1. The rejection of claims 1-9 and 11-19 under 35 U.S.C. 103(a) as being unpatentable over Legrow et al. (US 5,932,231) in view of JP 012686615 A is withdrawn because applicants argument that the JP reference does not disclose trimethylsilylalkylsilsesquioxane is persuasive.
2. Applicants' request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

#### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-9 and 11-19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,770,123. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Art Unit: 1618

issued claim 1 embodies the elements of examined claims 1-5; protective coating recited in the issued claim 1 and leave on composition for personal of the examined claims are both the intended uses of the compositions; the R of the sesquioxanes are hydrocarbons having carbon atoms of from 1-14 for the issued claims and 6-14 for the examined claims; the issued composition as well as the examined claimed compositions are emulsions and emulsions by their nature contain surfactants, oil and water; while the examined claimed composition is comprising and thus open to other ingredients, the examined claims do not claim polyethylene glycol or glycols, but the specification at paragraphs 38, 39, 62, 74 and 76 teach that polyethylene glycol is a surfactant/emulsifier; the issued claims do not recite the amount of the sesquioxane present in the composition; but differences in amounts would not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such amount provides unusual or unexpected results (see in re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955)). It would have been obvious to one of ordinary skill in the art at the time the invention was made to optimize the composition of the issued claims with the expectation of arriving at a composition having the desired properties as an emulsion.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blessing M. Fubara whose telephone number is (571) 272-0594. The examiner can normally be reached on 7 a.m. to 3:30 p.m. (Monday to Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Hartley can be reached on (571) 272-0616. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
